**Steven D Katz : Film Directing: Cinematic Motion, Second Edition** before purchasing it in order to gage whether or not it would be worth my time, and all praised Film Directing: Cinematic Motion, Second Edition:

2 of 2 people found the following review helpful. Must read for every budding film maker  
By StriderMaster This is an amazing piece of work that addresses the staging aspect of a film very comprehensively. Most of the books treat this subject with a lot of words, but Steven Katz has chosen to explain the nuances of staging in a visual form - demystifying the entire art behind it. If you are budding movie maker - read this before you stage your first shot.  
2 of 2 people found the following review helpful. Great resource for "intermediate" academic level directing and cinematography  
By meloniousthank This is a great guide because it contains lots of easy shot framing guides, and by lots, I mean LOTS. Well organized, so it's easy to flip through or use the table of contents if you're in a rush. Whether you need a inspiring tracking shot to help plan your next storyboard, or need to quickly figure out on set why certain blocking isn't working with your lighting, it's both comprehensive enough and easily accessible to serve both

functions, as both textbook and quick reference list. 1 of 1 people found the following review helpful. Great update  
By David Thompson I have the older edition and this one is a good update.

The book uses extensive illustrations to explain how to create extended sequence shots, elaborate moving camera choreography, and tracking shots with multiple story points.

.com A sequel to Steven Katz's *Film Directing Shot by Shot*, this book tackles specific problems of staging cinematic scenes. How should directors shoot scenes in confined spaces, such as small rooms or the interior of a car, in large open spaces, or with a number of characters involved in busy dialogue? As in his previous book, Katz addresses these problems by storyboarding hypothetical scenes for the camera, laying out a drawing of each shot in the sequence for readers to study. As a bonus, the book is peppered with interviews about creating shot sequences that Katz conducted with a number of professional filmmakers, including Allen Daviau, Ralph Singleton, and John Sayles.
