From Brand: Lorimer : Funny Things, Computers before purchasing it in order to gage whether or not it would be worth my time, and all praised Funny Things, Computers:

Funny Things, Computers offers a humourous visual examination of the early days of the personal computer, when technology invaded everyday life in innumerable, often hilarious, ways. You can love them, you can hate them - but

you certainly can't ignore them. Computers in the home, computers on the job, computers that we're plugged into every time we bank, shop or travel - they all have their little quirks and ironies that Hutchings captures perfectly. In *Funny Things, Computers*, Trevor Hutchings' unique sense of humour is directed at that wondrous invention that is at once man's greatest achievement, nemesis and alter ego.

About the Author **TREVOR HUTCHINGS**' distinctive cartoons have appeared in a number of publications including *TV Guide*, *Maclean's* and *Chatelaine*.'
