John L. Flynn, Bob Blackwood : Future Prime: Top Ten Science Fiction Films before purchasing it in order to gage whether or not it would be worth my time, and all praised Future Prime: Top Ten Science Fiction Films:

Whats your favorite science fiction film? At the start of the new millennium, fans who attended science fiction conventions persuaded Flynn and Blackwoodaka The Film Doctorsto conduct a survey of the Top Ten Science Films of the 20th Century. They then embarked on a ten-year odyssey to gather thousands of fan votes. The result: a list of

science fiction films that probably contains at least one of your favorites. Each film was considered from its inception, to the pre-production period, through production and finally the audiences reaction, reviews, critical responses and interviews with directors, producers and stars of the movies. An educational enlightening of the motion picture industry, it shows that it truly all starts with a thought, a vision, which when fed, honed and supported becomes where no man has gone before.
