Frank Scoblete, Dominator : Golden Touch Dice Control Revolution! How to Win at Craps Using a Controlled Dice Throw! before purchasing it in order to gage whether or not it would be worth my time, and all praised Golden Touch Dice Control Revolution! How to Win at Craps Using a Controlled Dice Throw!:

1 of 1 people found the following review helpful. A Great Craps Primer for Winners OnlyBy EM EdgeAn excellent book on this technique. I met a couple of Golden Touch novices at the Boat last week, and I could see why practice really IS the path to success. I liked the section on budgeting based on skill level. Look. The author says it best, you cannot win real money gaming on "random shooters." No so-called "system" that I've tried really pans-outs in real world. Forget it. Learn Golden Touch. Practice Golden Touch--and make your own cash.1 of 1 people found the following review helpful. Four StarsBy GMThis book is great, unfortunately I can't throw dice to save my life. SEVEN OUT...Line Away....Pay the Don't....Alas!1 of 1 people found the following review helpful. You will definitely get the edge at crapsBy E. Colonthis book shows the best and proven way to get the edge at craps without braking the casino rules , like hitting the back wall. I have seen people throwing good kill shots but it doesnt last long before the pitboss comes to their attention, but with this controlled shot, they cannot say anything, except if you are too slow setting the dice, that is the only way they can try to set your throw off.The first time played craps using the golden touch, I rolled aprox 60min and made more than \$300 bucks in a single roll playing the 6,8 and hardway minimum so imagine the winning possibilities if I were to play more money

Casino Craps: Shoot to Win contains all information from this book plus much, much more.

"Start your education and learn from the best. Frank Scoblete and Dominator are the Grand Masters of dice control." -- Dr. Henry Tamburin, Blackjack Insider Newsletter, September 2005From the PublisherI have been writing articles and books about casino gambling for over 30 years. When Frank Scoblete first started writing about dice control and the Captains and the Arms adventures in the late 1980s, I really didnt believe such a thing was possible. While I respected Franks profound knowledge of casino games, I just couldnt believe someone could control the outcome of his dice rolls.Boy, was I wrong!Since 2002, I have been to the craps tables with Frank Scoblete and Dominator over fifty times and I have seen their skill in action in the casinos. Ive seen both Frank and Dom have hour-long rolls many times. I have even read the great story of the Captains 147-roll hand on the golden touch craps web site and let me say again for all to hear, I believe! I understand how luck can work in casino games but the kind of consistent winning sessions these great Golden Touch shooters have goes way beyond luck. They have a skill that can be used to beat the casinos.And the remarkable new software product SmartCraps has tested the skill of both these men. The developer of the software, when asked to explain Franks talent, said: "Its godly." And Dominator? "He can get edges on some of the worst bets at the game!"Dice control is a real skill. Of course, you have to know how much to bet on yourself, what bets to make, and whether to bet on other shooters. All of this information is covered in Golden Touch Dice Control Revolution! With over 90 photographs and clear precise language Frank Scoblete and Dominator will show you what you need to know to create your own Golden Touch.You know, I wish I had listened to Frank in the late 1980s!From the AuthorThis book is now out of print but my new book Casino Craps: Shoot to Win! has all the information from Golden Touch Dice Control Revolution and much, much more.
