From Alfred Publishing Company : Goondiwindi (Orchestra Expressions Book 2) before purchasing it in order to gage whether or not it would be worth my time, and all praised Goondiwindi (Orchestra Expressions Book 2):

The distinctive title matches the unique nature of this delightful Australian folk song which is traditionally sung during shearing time. The song features melodic material that moves across all the instruments in the string family. And, charismatically adding the unique sound of tapping on the instruments, you can expand the variety of sounds and reinforce independent techniques. Multicultural and dynamic, this is a wonderful addition to the literature targeted for

students in the middle phase of Orchestra Expressions Book Two. (1: 33)
