It contains lots of great mysteries for you to solve, and they also have clues and solutions in the back of the book. However, they only have 42 mysteries, which is a bit less than I expected. Overall, it is a great book. 1 of 1 people found the following review helpful. Not just for Americans By Dr G Good variety of puzzles. Keeps my kids aged 10 and 12 interested. No weak logic like some others. However, the real value is that it is genuinely international. So many American books assume you know American facts like the rule of baseball (the rest of the world plays softball or cricket). 1 of 1 people found the following review helpful. Not what was expected By Lucky Star I bought this expecting a series of whodunits-the kind where you solve crimes, what this book had instead was a series of problems that read like middle school math problems and were at times dry and in some cases overly long or vague. In the end, if you like Tom Bullimore's books, you'd love this.

Test your powers of deduction on 43 phony alibis, baffling clues, bits and pieces of evidence. Decipher codes as you match wits with such great detectives as Will Ketchum and Donna DiAnsa, as well as law enforcement officers like Luke Sharp, Hans Zupp and Carla Kopp. For many of the puzzles you'll find extra hints and clues to help you along, if you need them! "A clever presentation of entertaining puzzles...." --Mathematics Teaching in the Middle School. 128 pages, 25 b/w illus., 5 3/8 x 8 1/4.
