**Helen Hughes : Green Documentary: Environmental Documentary in the 21st Century** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Green Documentary: Environmental Documentary in the 21st Century:

During the first decade of the twenty-first century, a stunning array of documentary films focusing on environmental issues, representing the world on the brink of ecological catastrophe, has been met with critical and popular acclaim. This cohesive and accessible volume is the first book-length study of environmental documentary filmmaking,

offering a coherent analysis of controversial and high-profile documentary films such as Gasland, An Inconvenient Truth, Manufactured Landscapes, and The Cove. With analysis that includes the wider context of environmental documentary filmmaking, such as Modern Life and Sleep Furiously, about local rural communities in Britain and Europe, Green Documentary also contributes to the ongoing debate on representing the crisis.
