Covers the whole realm from Casinos to dealers and playing. Enjoyable read. 11 of 13 people found the following review helpful. Answer to direct question. By Gregory Mannarino I am sorry you do not understand the game well enough to realize that you must do anything and

everything you can in a gambling endeavor such as blackjack to maximize your chances at winning. You must realize that even playing with an advantage does not mean that you will always win, playing with an advantage means that you will "probably" win. Let me further explain: By seeking out games with a positive bias as I describe at length in the book, you are trying to take into account everything you can possibly do in order to pull a winning session. Remember, even the house does not win all the time, even with slot games with horrible house advantages. Playing with any kind of advantage not only requires a sufficient bankroll, but also the time required to present itself. Playing blackjack the way I describe in my book has allowed me to live a nice lifestyle, I wish you the best of luck. 2 of 3 people found the following review helpful. The 'Gregorian Strategy' does not perform better than the common basic strategy. By Jacob I have a side hobby of reading up on blackjack and enjoy playing it on weekends sometimes. Figured a new basic strategy that supposedly performs better than the 'old basic strategy' would be great to learn and wanted to see if it was true or not. Well it's not I don't have a simulator of my own to use and wish someone would run a simulation but I ran through a couple thousand hands on my own using a 6 deck shoe with old strategy against the Gregorian strategy and the old strategy came out on top. I will not be using the Gregorian strategy in any casino unless I see some true evidence it performs better. Also the book is filled with useless information of him in Atlantic City and Las Vegas along with old information that is in every blackjack book.

Publisher Comments: The revolutionary strategy that will help every player beat the house without counting cards. Gregory Mannarino has devised his own Gregorian Strategy, the only strategy that is specifically designed to take advantage of the rules offered by multiple deck games. By understanding the basic rules of the game and their variations, players will begin to realize that some games have rules that are more favorable to the player than others, learn how to determine the probabilities of winning various combinations of player and dealer-up cards, and learn how to attack the dealer when he's most vulnerable.
