A good selection for beginners of Pixel Puzzles but not perfectBy rmac1117Compared to other Hanjie/Pixel Puzzle/O'ekaki puzzle books, this one offers generally more coherent puzzles which won't bog down into having to guess or assume, or produce a picture which (still) doesn't make sense even if completed correctly. But they are also more simplistic.This is a good selection for beginners with this type of thing. The 4 pictures on the cover are included, but it is a shame the solver would have to will-power himself away from peeking at the cover when doing the puzzle.A nitpick: Though the book is a good large, squarish size, it is somewhat difficult to hold open without a paperweight, the paper is good quality but smudges easily, especially in large darkened areas.0 of 0 people found the following review helpful. A nice book if you're into this kind of puzzle.By mscatmarI tried this kind of puzzle a few year ago. I'm normally pretty good at puzzles, but ths type was difficult for me to comprehend. I purchased this book because it said "easy". I looked through the book when it arrived

only to discover I still didn't "get it". 1 of 1 people found the following review helpful. Good beginner book plus  
By Janice  
Addendum: Have gone farther into the puzzles now, - the grids do become more complex, and the blocks smaller to smooth out the pictures. Changing to 4 STARS to reflect the diversity and the low price.  
Original: Excellent for beginners but maybe a different choice if you're at all experienced, because the blocks are so big the pictures aren't at all smooth.

Welcome to this brilliant collection of easy Hanjie! This book is the perfect way to introduce yourself to the fun and interesting puzzle that is, Hanjie! A Hanjie Puzzle Consists of a grid that may be of any width or height. The aim is to fill in the number of squares specified in each row and column to create a picture. Typically, the larger the grid the harder the puzzle though this does not always follow. You will notice at the top and left of the puzzle are a set of numbers. These indicate which cells within the grid are to be filled in. For instance: A 1 next to a column indicates one cell is to be coloured in in that column A 3 means that three cells should be coloured in that column A 1, 1 means that there are two cells coloured in total; and there is a gap of at least one blank (non-filled) square between the two filled squares. All of our books are printed on very high quality paper, making the puzzle experience all the more enjoyable! This book is part of our huge collection of puzzle books, all available at [www.puzzle-book.co.uk](http://www.puzzle-book.co.uk)
