0 of 0 people found the following review helpful. Awkward formatting mars this book of puzzles. By Carol Mello The problem with this sudoku book is the formatting of both the puzzles and the solutions. The formatting into rectangles makes it harder to visualize and solve the puzzles. The formatting of the solutions in rectangles, but not the same rectangles as the puzzles, makes comparing completed puzzles against solutions another awkward experience. Advice

for publisher: Please reformat your sudoku books using squares, not rectangles. Please put given numbers in the puzzles in **BOLD** face. Remember, these puzzles are derived from Magic Squares so please use Squares and not Rectangles. When you decide to use Squares instead of Rectangles, let me know and I will buy more of your books. Really, the hard part in publishing sudoku books should be coming up with good flawless puzzles, not formatting the puzzles into the proper square shape. Please, please, please, fix the formatting!
